Education

B.Tech – Computer Science Vellore Institute of Technology (VIT) GPA: 8.48 / 10	Nov 2022 – May 2026
Class XII – MPC Narayana Junior College, Hyderabad Score: 89.9%	Apr 2021 – May 2022

Technical Skills

AI / ML	PyTorch · Hugging Face Transformers · scikit-learn · BERT · LSTM · NLP
Languages	Python · Java (Core, OOP) · SQL · JavaScript
Frontend	React · HTML5 · CSS3
Backend	Node.js · Express · REST APIs · WebSocket
Databases	MySQL · MongoDB
Tools	Git · GitHub · Postman · Jupyter Notebook · Google Colab

Experience

Frontend Developer Intern – CodeSoft	Jan 2024
---	----------

- Built fully responsive web interfaces using semantic HTML5, CSS3, and JavaScript — ensured cross-browser and cross-device consistency across all delivered projects.
- Developed a professional portfolio and multiple interactive projects following modern UI/UX principles; maintained clean Git workflows throughout the development lifecycle.
- Independently debugged layout and functionality issues across varying screen sizes, strengthening systematic problem-solving skills in a production-like environment.

Projects

LawDesk – Full-Stack Legal Marketplace	Sep 2024
---	----------

Tech Stack: React · Node.js · Express · REST APIs · WebSocket · MongoDB · HTML5 · CSS

- Architected a full-stack legal marketplace with RESTful APIs handling case posting, expert bidding, and client-lawyer matching end-to-end ownership from DB schema to UI.
- Integrated a real-time AI chatbot via WebSocket for live preliminary legal guidance, automating a significant share of initial client queries and cutting manual response time.
- Built a centralized Legal Resource Library with full-text and faceted search; iterated features based on beta-tester feedback, measurably improving platform engagement.

GPT-2: Fine-Tuning vs. Few-Shot Learning Benchmark	Sep 2025
---	----------

Tech Stack: Python · PyTorch · Hugging Face Transformers · GPT-2 · Google Colab

- Designed and implemented a complete fine-tuning pipeline for GPT-2 data preprocessing, training, and evaluation on a movie dialogue dataset using Hugging Face libraries.
- Built a few-shot prompting system to rigorously benchmark in-context learning against fine-tuning; quantified trade-offs using perplexity metrics and qualitative analysis.

Fake News Detection System	Aug 2025
-----------------------------------	----------

Tech Stack: Python · NLP · scikit-learn · NLTK · BERT · LSTM · Pandas · NumPy · Jupyter Notebook

- Developed a multi-model fake news detector combining Naive Bayes, Logistic Regression, LSTM, and fine-tuned BERT into an ensemble, achieving robust classification performance.
- Evaluated all models using precision, recall, F1-score, and ROC-AUC; iterated through multiple model versions with structured debugging to progressively improve accuracy.

Certifications

- iamneo – Data Science Professional Certificate (Python, Data Analysis)
- IBM – Cybersecurity Analyst Professional Certificate
